**WADE ANNOUNCES DRAIN WORKS 3D PIPE DESIGN SOFTWARE FOR SIPHONIC STORM SYSTEMS**

TYLER, TX January 18, 2020: Wade, a manufacturer of premier drainage products, has announced the release of the new Drain Works software. Drain Works is a 3D pipe design program created with emphasis on siphonic storm systems as well as gravity storm and single stack sanitary systems.

“This project represents the culmination of many years of research and development based on customer feedback and the changing industry demands,” said David Jones, Vice President of Sales for Wade.

This user-friendly design interface incorporates various features including, realistic 3D output, Autodesk compatibility features, and an unmatched, state-of-the-art method for hydraulic calculation that employs the use of actual pipe and fitting dimensions.

WADE has long been at the forefront of the siphonic drainage revolution and it continues to be one of their highest priorities. Wade looks forward to many successful years as the leader in the industry.
